Quote of the Day: It sounds like a psychotic kazoo.. Has anyone else ever heard of or played one of these saxes made in the Czech Republic One more time, I was taught the lesson to never judge a book.

Claude 013 The stock mouthpiece was always awful for the ones I saw but maybe just a coincidence.. Current Amati production is of instruments that have visual similarity to Yamaha horns, but arent high quality.

Some young students play realtively new Amati student models, both clarinets and saxophones.. The reason I am posting this is when I play tested the sax, it knocked my socks off.. It needed quite a bit of work, but it seemed to be pretty well made It was quite heavy and had the bell key mechanisms of the old Bueschers and a LH pinky table shaped much like a Martin I believe.. For a better experience, please enable JavaScript in your browser before proceeding.. I would really like to try one of their more professional models, if the student horns play that well. I bought one several years ago, because it came with a hard-shell formed case I wanted (good case free sax). [Medal Of Honor Код Активации](#)

A beautiful even scale from top to bottom, a nice warm rich tone, and excellent intonation throughout the range.. If we go by when Amati was created (1945-1948), this would be one of the very first horns from Amati.. It reminded me of some of the complex keywork on a Leblanc horn, but without the quality.. Pretty much all were pretty decent, felt fine, sounded ok (with the exception of the C clarinet which seemed to have severe intonation problems, like my Forte made by Amati, in fact they seemed exactly the same) but nothing exciting IMO.. There are pics of full-on Keilwerth models in here, as well as Amati-assembled horns with their own serial numbers.. Some local players, including professional players, have Amati saxophones and really like them.. Amati Classic Super, which was also stenciled as the King Lemaire There seems to have been at least one or two models after the Amati Toneking models and before the Classic Super, but Ive not been able to get pics: Ive just heard of them.. It looked like someone had gotten plans from a YTS-52 and translated the measurements off by a couple MM, so some keys had to sit on flanges and such.. This was obviously one of the earlier student models I went to their website and they have several models above the equivalent of this one. ceal14251b [Wow Patches Manual Download](#)
